

# PCCA VersaBase<sup>®</sup> Cream

Patent-Pending Technology

An Ideal Base for All Topical Preparations

PCCA # **30-3641**

Soothing and gentle, even for the most sensitive areas.

**VersaBase Cream** is an elegant, yet durable, topical cream. It simulates the natural moisturizing barrier of the skin through its emulsion system and rubs in quickly, leaving a soft and silky feel.

This base can be used for a variety of pharmaceutical and cosmetic applications, and is **an ideal compounding base for topical and vaginal preparations, including hormone replacement therapy**. A wide array of active ingredients can be incorporated into the base, including those used in topical, vaginal and dermatological formulations.

## BENEFITS

- Noncomedogenic
- Hypoallergenic
- Nonirritating
- Odor-free
- Natural emulsifiers
- Long-lasting moisturizing effect
- Stable over a broad pH range (3.5 to 12)
- Nonionic emulsion system, compatible with cationic and anionic substances
- No incidence of "pilling" when applied to the skin

## RELATED SPECIALTIES

- Hormone Replacement
- Vaginal
- Antibiotics
- Antifungals
- Corticosteroids
- Sunscreens
- Anti-Aging
- Anesthetics

## FORMULATED WITHOUT

- Oils
- Parabens
- Propylene glycol
- Petrolatum
